Foreword

Dear chess player,

The main purpose of this creative book is to help you understand (and play) the main opening systems that arise after White's first move 1.d4. The pawn structures on both sides of the board are already determined by this first move, and these structures are what you will need to focus on first and foremost. Every specific chapter in this book will then serve as an augmentation of this basic knowledge.

An Attacking Repertoire for White with 1.d4 presents a selection of opening variations. These opening choices I have made are an important factor in my personal approach to chess.

The repertoire presented here focuses on active play supported by a powerful pawn centre.

The Four Pawns Attack against the King's Indian Defence and the moves 4.a3 and 4.f3 against the Nimzo-Indian Defence are choices in my repertoire that already featured in my earlier book Revolutionize Your Chess

(New In Chess, 2009). After these 10 years this repertoire still stands firm, though of course all the lines have been carefully checked and updated for this project.

In the chapters on the Nimzo-Indian and the Exchange Variation of the Queen's Gambit (Nos. 7 and 11), I hope I have managed to deepen and further develop the concepts that were established earlier by the sixth World Champion, Mikhail Botvinnik (1911-1995). In those chapters you will also learn a lot about the fabulous 'Sämisch structures' (with f2-f3).

Mikhail Botvinnik at the Hoogovens tournament, 1969.

In the rest of the chapters, I have combined the knowledge I have gained through many years of experience with several modern ideas and analysis with computer engines.

This book presents 10 fundamental openings plus 4 original defensive systems for Black (Chapters 3 and 12-14), which complement those basic openings but are included mainly for their surprise value (note: for anti-Dutch lines for White, see my book The Diamond Dutch, New In Chess 2014).

Strategies for the white player in 1.d4 openings

- You will have to sacrifice material more often than accept sacrifices by your opponent. However, there are some exceptions, such as in the Albin Counter-Gambit (Chapter 14), where Black simply insists too much!
- If Black chooses an opening with a fixed pawn centre (1.d4 d5), then it is important for White to pay special attention to the placement of his pieces.
- Conversely, if Black's play is aimed at controlling the centre with his pieces (1.d4 ②f6), the assimilation of the pawn configuration has a key importance, since the set-up of the pieces will follow naturally from this step.
- Of course, in our repertoire, the attack is not a universal panacea against all of Black's opening choices. In some cases, the clearest path to success will be a transposition to a favourable endgame.

Do not forget that you are also an active participant in the creative process and the development of the opening systems proposed in this book!

I would like to wish you great success in your future chess battles!

Grandmaster Viktor Moskalenko Dubai/Barcelona, May 2019

Six Symbols

TRICK: hidden tactics and some tricky ideas, e.g. traps you can set and pitfalls you have to avoid.

PUZZLE: possible transpositions, move order subtleties, curiosities and rare lines.

WEAPON: the best lines to choose; strong or surprising options for both attack and defence, which deserve attention.

PLAN: the main ideas for one of the sides in the next phase of the i≡i -- game.

STATISTICS: winning percentage for a line or for either side/player.

KEEP IN MIND: here, fundamental ideas for either side are given.

CHAPTER 2

Modern Benoni Defence

The Taimanov Attack in the past and future
1.d4 ②f6 2.c4 c5 3.d5 e6 4. ②c3 exd5 5.cxd5 d6 6.e4 g6 7.f4 ②g7 8. ②b5+

Nautilus is the future, gentlemen! - Captain Nemo.

8. 2b5 is a powerful check! For many years, this strong resource has

remained the chief weapon of numerous players against the Modern Benoni. Among other advantages, White's idea is simply to gain one tempo.

In this chapter I would like to present some original ideas in the aggressive Taimanov or Four Pawns Attack that, in my opinion, have not yet been well-developed or sufficiently analysed by modern theory.

Mark Taimanov.

My opinion on 8. ዿb5+ 🖄bd7

8... 16 fd7 is Black's main defence

against 8. \$\overline{\pmathbb{L}}\$ in the Taimanov Variation. No good is 8... \$\overline{\pmathbb{L}}\$d7? because of 9.e5!, with a large advantage for White. The move 8... \$\overline{\pmathbb{L}}\$bd7, however, is more natural, although it gives White the possibility of a frontal attack with 9.e5! (White has to start his tactics immediately, since without this move Black can develop comfortably) 9...dxe5 10.fxe5 \$\overline{\pmathbb{L}}\$h5.

Now 11.e6! is the main and principled line: 11... 營h4+ 12.g3 公xg3 13.hxg3 營xh1 14.êe3.

As recent games (and analyses) show, Black's position is completely hopeless.

See Game 10: Peralta-Lacasa Diaz, Catalonia tt 2014.

A bit of history

In the year 1988 (!) I received an invitation to play in an interesting closed tournament for promising young players in Yerevan, the capital of Armenia. During my preparation, I realized that against 1.d4 almost all participants (including myself) had in their repertoire the Modern Benoni Defence, which was very popular at the time. This forced me to dedicate some time to the study of this creative opening and to prepare an interesting and effective idea...

Three alternatives

The position after **8...**②**fd7** was the focus of my studies before I started in the tournament in Armenia. The black pieces do not look very active at the moment, because White has spent more time on his development. But the bishop does not do anything either on b5 and will soon be attacked there.

Now we have many options. How to continue?

A) There is GM Lutikov's advance 9.a4, preventing Black's counterplay with ...a7-a6 and a quick ...b7-b5. I did not like this very much, because the b4-square is weakened and a black knight can be comfortably placed there. 9...0-0 10.\(\Delta\)f3 \(\Delta\)a6 11.0-0 \(\Delta\)b4 12.h3 (or 12.\(\Delta\)e1 a6 13.\(\Delta\)f1 \(\Delta\)e8 14.h3 f5!?) 12... a6 13.\(\Delta\)c4 f5!N.

An important novelty in a well-known position. This is one of the main ideas solving the central problems in the Benoni. I think this move will have a bright future — A.Kapengut, 2002.

But anyway this retort has always been fashionable, thanks to the fact that it was used by Garry Kasparov in several games;

- B) Worthy of attention is 9.\(\Delta\)f3 a6 10.\(\Quad e2\) b5, with an unclear position (recently analysed in various books);
- C) Taimanov's move is 9.\(\hat{2}\)d3, for example: 9...0-0 10.\(\Delta\)f3 \(\Delta\)a6 11.0-0 \(\Delta\)c7 12.\(\Delta\)d2 \(\Delta\)f6 13.h3 \(\Beta\)e8 14.\(\Beta\)f3 \(\Beta\)b8 15.a4 \(\Delta\)a6 16.\(\Delta\)c4 \(\Delta\)b4 17.\(\Delta\)b1 a6 18.a5 \(\Delta\)f8 19.f5 \(\Delta\)e7 20.fxg6 fxg6 21.e5 dxe5 22.d6 \(\Delta\)xd6 23.\(\Delta\)xd6 \(\Beta\)xd6 24.\(\Delta\)e4 1-0 Taimanov-Trifunovic, Leningrad 1957.

Whatever the case may be, I can assure you that each of these plans has its advantages and weak points.

The idea behind 9. \(\hat{g}e2!?\)

After analysing the well-known practical examples (please note that in 1988 there were no personal computers yet and until 1995 I studied at the

board, using books and magazines – and my own head!) I soon realized that the secret of this position is based on the fact that in general, Black's counterplay is very dynamic, depending on what White plays next. There are enough resources for both sides.

But what I liked was the suggestion of 9. \(\pm e2!?. \)

This continuation seems very flexible and corresponds to my approach to openings: look for paths that are studied little and used rarely and that contain original hidden plans.

Typical black plans

By putting his queen's knight on a6 Black starts a common plan in the Benoni. One is to try the advance ...b7-b5: ...\$\overline{\text{c7}}, ...\$\overline{\text{b8}}, ...a7-a6, ...b7-b5. If now (or also earlier) 10...\$\overline{\text{c6}}?!, White gains a clear tempo compared to the theoretical positions (see examples in Game 11 and Game 14)!

One of the insoluble problems for Black in the Taimanov Variation is where to put these crazy knights (see also the comment to 15... 2a6 in Game 14)!

The CapNemo plan

After **9.ûe2 0-0 10.Øf3 Øa6 11.0-0 Øc7** we reach another key moment.

12. \triangle d2 used to be a popular continuation, but I believe that 12...f5 is an important resource for Black here. 12. \triangle h1!? is also played, with the idea to prepare the advance f4-f5.

But when I analysed this position more deeply, I found that White has another interesting plan: **12. d2!?**. This might be called the 'CapNemo Plan', after several Internet wins with it by myself under that handle.

The queen's bishop will be manoeuvred to the h4-square, or to g3, from where it can support the typical break e4-e5.

In Game 11, Moskalenko-Minasian, my rival found it was difficult to solve all the problems that arose in the opening, and in the short middlegame struggle White dominated from the start, displaying good knowledge of the strategic plans and tactical resources.

In Game 12, Moskalenko-Makarevich, we will investigate the 12. \(\hat{\pm} \)d2!? plan more deeply. Here we observe other ways to go wrong for Black, due to errors at critical moments. Perhaps his best chance was ...f5!? on move 16 or 18, with a complicated game, although we should not forget that in the 1980s and '90s all resources of these positions were not known yet. More recent games are found in Game 13, Moskalenko-Sanz Alonso.

As for 12.a4!?, this move often only transposes to known positions. It is an alternative to 12.\(\hat{L}\)d2!?, but the plans are very similar. It is possible that this advance is more reasonable here than on move 9, since Black now needs more time to take the knight to the b4-square: ...\(\hat{L}\)b8-a6-c7-a6-b4.

In Game 14, Moskalenko-Magerramov, we find more illustrative examples, along with other attempts and plans. After resigning this game, my opponent commented to me: 'It seemed as if I was lost from the beginning; 8. § b5 and what you played immediately afterwards is a deadly plan.' I still agree with this evaluation.

KEEP IN MIND

Due to the fact that there are quite typical moves in the opening, some games can transpose one to the other (Games 11-14).

Other plans for Black

Another plan for Black is **9/10...** The main idea of this check is to weaken White's kingside structure. However, Black is wasting important time. With this option we transpose to a game by a student of mine. During the same tournament in Yerevan, I taught the idea of 9. 2e2 and 2d2 to my student, IM Stanislav Savchenko, who soon used it successfully in his games. See S.Savchenko-Pigusov (Game 15). Recent games of my own with 9... 4+ are Moskalenko-Fernandez Vicente (Game 16) and Moskalenko-Almeida Quintana (twice in Game 17).

In Game 18 we will examine an interesting option for Black: 9...0-0 10. △f3 f5!?.

A blow to the white centre! This move (in similar positions) was used by World Champion Tigran Petrosian and later by his colleague Veselin Topalov. It is a push rich in resources, well-known in the Modern Benoni and in similar structures.

In this case, Black takes advantage of the position of his knight on d7 to advance the f-pawn. Strangely enough, after **11.exf5** gxf5, practice has seen only one game with this position: Ezat-Ghaem Maghami (Game 18).

Modern Benoni 8. 9b5+ - Games

My opinion on 8... ∅bd7

Game 10

Alexander Fernando Peralta 2603 José Antonio Lacasa Diaz 2411

Game 13

Viktor Moskalenko 2543 Francisco Sanz Alonso 2400

Andorra la Vella 2006 (8)

1.d4 ②f6 2.c4 c5 3.d5 e6 4.②c3 exd5 5.cxd5 d6 6.e4 g6 7.f4 ዿg7 8.ዿb5+ ②fd7 9.ዿe2 0-0 10.②f3 ②a6 11.0-0 ③c7

In order to complete our study of this typical position, we will look at other attempts.

12.a4!?

PUZZLE: This prophylactic move normally transposes to the lines 12. 2d2 2e8 or 12... 2b8 as in Games 11 and 12 above. However, there is also an extra idea − see the strong weapon on move 13.

12...a6

13. **≜**d2

WEAPON: 13.f5!? is another attacking resource which seems to work perfectly here: 13... ②e5 14. 圖e1!? (the transfer of the queen to the kingside) 14... ■b8 15. 圖g3! ②xf3+ 16. ■xf3 ②e5 17. ②f4+−

Anagnostopoulos-Lazaridis, Anogia 2018.

13...\bulletbb b 14.\bullete e1!?

14.a5!? is Game 12 above.

14...b5

15. gh4

Following my predetermined plan.

WEAPON: However, in this position White should start with 15.e5! dxe5 and now 16.彙h4 (16.d6!? is similar) 16...彙f6 (16...豐e8 17.d6 ②e6 18.axb5 axb5 19.fxe5 ②xe5 20.②d5!1) 17.彙xf6 豐xf6 18.d6 ②e6 19.②d5 豐g7 20.axb5! axb5 21.藁a7! ��h8 22.②xe5 ②xe5 23.fxe5+— A.Aleksandrov-Hedman, Stockholm 1995.

15...2f6 16.2xf6 ⊘xf6 16...**₩**xf6 17.**₩**d2 b4 18.**⊘**d1±.

17.axb5!?

In the previous century I played
17.e5 b4! ≠ 18.exf6 bxc3 19.bxc3

wxf6 20. wd2 = b3 21. c4! b8
22.h3 cf5 23.g4 cd7 24. c5 bfe8
25. ae1 axe1 26. ae2 ae8 27. c4

wh4 28. cf2! wxh3 29. cf6+ c97
30. cf1 wxc3 31. cxe8+ cxe8 32.g5

cxa4 33. c4 cd7 34. c7 ca4 35.f5

cf8 36.f6 h6? 37. c4 (37.gxh6!)
37... cd7 38. c4 h5 39. c1 wxe1
40. ae4 41. ca6 cb3 42. c7

cxd5 43. cb5+— MoskalenkoTotsky, Moscow 1992.

17...\$\xb5

17...axb5 18.e5!?.

18. ≜xb5

WEAPON: I missed the correct attack: 18.e5! △xc3 19.bxc3 dxe5 20.fxe5 △xd5 21. ₩c1! △e7 22. △g5↑.

18...axb5 19.\(\bar{2}\)e1?!

19.e5!?.

19...≌e8

19...b4!?**⇄**.

20.e5 b4 21.∅a4 dxe5 22.fxe5 ∅xd5 23.∅xc5 ĝg4 24.h3 ℤb5 25.ℤc1 **⋓**b6?

25...ዿxf3□ 26.xf3 匂c3! (26...b6? 27.ℤf1!) 27.匂d3 匂d5=.

26. ₩xd5 &xf3

27. **營d**6!

27...**≜**a8

28. 營xb6 亞xb6 29. 公d7 亞c6 30. 亞xc6 盒xc6 31. 公f6+ 含f8 32. 公xe8 含xe8 33. 亞d1 1-0

The value of this game (and the next one): we have discovered some additional advantages of the flexible move 12.a4!? – for example 13.f5!?.

Game 14

Viktor Moskalenko 2555 Elmar Magerramov 2565

Rostov-on-Don 1993

1.d4 ∅f6 2.c4 e6 3.∅c3 c5 4.d5 exd5 5.cxd5 d6 6.e4 g6 7.f4 ≜g7 8.≜b5+ ∅fd7 9.≜e2 0-0 10.∅f3 ∅a6 11.0-0 ∅c7 12.a4!?

This is an alternative to 12. 2d2!?, but the plans connected with it are very similar. Possibly this advance is more reasonable now than on move 9, since it takes Black more time to take his knight to the b4-square: ... 2b8-a6-c7-a6-b4.

Azeri GM Elmar Magerramov: 'It seemed as if I was lost from the beginning...' In his youth, Magerramov helped Garry Kasparov to understand the complexities of the Modern Benoni System as Black.

12...a6 was seen in Game 13. Remember: 12... 2a6?! 13.f5!.

13. **₩c2**

WEAPON: It is also possible to return to the idea of 13. \(\hat{\hat{\hat{2}}}\)d2!?. Then in case of 13...\(\hat{\hat{\hat{\hat{2}}}}\)xc3?! 14.\(\hat{\hat{\hat{2}}}\)xc3 \(\beta\)xc4 (14...\(\hat{\hat{2}}\)f6? 15.\(\hat{\hat{2}}\)g5!) 15.\(\hat{\hat{2}}\)g5 \(\beta\)e8 16.\(\hat{\hat{2}}\)d3→ White has good possibilities of a kingside attack.

13...5)f6

Remember: thus White wins a tempo: \(\hat{2}b5+-\&fd7, \\hat{2}e2-\&f6.\)

12... **⊑**e8

WEAPON: 13...a6

analysis diagram

14. \(\hat{2}\)d2!? \(\beta\)b8 15. \(\hat{2}\)e1! b5 16.e5! dxe5 17. \(\hat{2}\)h4\(\hat{1}\).

14. ĝd2 ĝg4 15. Ĭae1 ∅a6

One of the paramount problems for Black in the Taimanov Variation is where to put his 'crazy' knights!

WEAPON: 15...a6 16.h3 (16.a5!?±) 16...\(\hat{2}\) xf3 17.\(\hat{2}\) xf3 b5 18.e5!\(\hat{7}\);

■ WEAPON: I believe 15... 47 is somewhat passive. It allows White to obtain the initiative: 16. 55 (16. f5!?; 16. fh!?) 16... 2xe2 17. 2xe2 c4 18. 2e3 a6 19. 42 (19.e5! dxe5 20.f5±) 19... b5 20.e5! dxe5 21.f5 f6 22.d6 b4 23. 6c4 6cd5 24.fxg6 hxg6 25. 2xf7! 47 26. 6fg5+— Moskalenko-Alonso Rossell, Banyoles 2006;

■ WEAPON: Five years later the evaluation remains unchanged: 15... 這b8 16.h3 逾xf3 17. 逾xf3 ②d7 18.g4 ②a6 19. ②b5 ②b4 20. 豐b3 豐b6 21. 逾g2 ②c6 22.a5 ②xa5 23. 豐a4 a6 24. ②xd6 豐xd6 25.e5+— Avila Gimenez-Alonso Rosell, Barcelona 2011.

16. \(\ext{\hat{\hat{Q}}} \) c4

All ready to fire away with e4-e5!. **17... \(\) xf3 18. \(\) xf3 \(\) g4 19.g3!**\(±

This strong preventive move avoids all counterplay along the dark squares. White is much better.

WEAPON: 19.e5!? dxe5 20.d6±. **19...f5**

Finally Black starts to look for new resources! But it's already too late.

20.h3 fxe4 21. 2xe4 2h6 22.g4! 2f7

23. 2g2 2d4 24. 2c3!+-

A spectacular position.
